

## KI Europe - Daylight®

**Product Description:** KI's Daylight chair – the first all- mesh ergonomic and ecologically sound stacking chair. Frame parts for the seat and back are 100% recycled plastic from car batteries, the mesh seat is made of the same duration material used to make safety belts. Daylight weighs only 3.8kg, making it about 40 percent lighter than other stack chairs on the market and can be easily moved and stacked by one person.
